SECTION 00 91 13 – ADDENDUM #1

DATE: March 06, 2023

PROJECT TITLE: Carmel Wastewater Plant Digester Gas Piping Replacement Project

PROJECT No.: 201802061

OWNER: City of Lawrence

ENGINEER: American Structurepoint, Inc.

TO: Prospective Bidders

This Addendum forms a part of the Contract Documents and modifies the Bidding Documents dated January 23, 2023, with amendments and additions noted below.

Acknowledge receipt of this Addendum in the space provided in the Bid Form. Failure to do so may disqualify the Bidder.

This Addendum consists of 2 pages and the following Attachments:

No.	Attachment Title	Issue Date
1	Pre-Bid Meeting Minutes and Attendee List	March 6, 2023
2	Updated Davis-Bacon Wage Determination	March 6, 2023
3	Appendix C – Anaerobic Digester Floating Covers Inspection Report	March 6, 2023

Amendments and Additions:

1. Section 00 73 14

- a. Replace wage determination dated 01/06/2023 with wage determination dated 03/03/2023 included with this Addendum.

2. Add Appendix C to the project manual.

Questions Received:

Q. Who does the Contractor need to coordinate with to store equipment onsite?

A. The City will coordinate with the contractor to store things on site. The City will not allow any unloading of materials or large equipment in the absence of the Contractor onsite.

Q. Do the digester lids need to stay on or come off while their rims and edges are getting painted?

A. The floating digester lids need to stay on at all times. They can be moved up and down on the corbels to properly clean, coat and collect any debris.

Q. Has any inspection been completed for the current condition of the primary digester covers (Digesters 1 and 2)?

A. Yes, an inspection was completed. The inspection report is included with this Addendum and added as Appendix C.

Q. Where do the temperature probes need to be installed and is the 30' of cable called out long enough?

A. See sheet E104, note 13, and sheet E107 note 19. Contractor shall confirm the length of cable prior to ordering.

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60).

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	. Executive Order 14026 generally applies to the contract. . The contractor must pay all covered workers at least \$16.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2023.
If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:	. Executive Order 13658 generally applies to the contract. . The contractor must pay all covered workers at least \$12.15 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2023.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the

Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at <http://www.dol.gov/whd/govcontracts>.

TRUCK DRIVER CLASSIFICATIONS

GROUP 1: Single/batches axle straight trucks; Batch trucks, wet or dry 3 (34E) axle or less; Single axle Grease and maintenance truck

GROUP 2: Single axle fuel and water trucks

GROUP 3: Single axle ""dog-legs"", and tandem truck or dog-legs; Winch trucks or A-frames when used for transportation

purposes; Drivers on batch trucks, wet or dry over 3 (34E) batches and tandem axle grease and maintenance truck

GROUP 4: Tandem axle fuel trucks; tandem axle water trucks; butuminous distributors (two-man)

GROUP 5: Tandem trucks over 15 tons payload; Single axle semi trucks; Farm tractors hauling material; Mixer trucks (all types); Trucks pulling tilt-top trailer single axle; Single axle low- boys; Truck-mounted pavement breakers

GROUP 6: Tandem trucks or ""dog-legs""; Semi-water Truck; Sprinkler Truck; Heavy equipment-type water wagons, 5,000 gallons and under; butuminous distributors (one-man)

GROUP 7: Tri-axle trucks; Tandem axle semi trucks; Equipment when not self-loaded or pusher loaded, such as Koehring or similar dumpsters, track trucks, Euclid bottom dump and hug bottom dump, tournatrailers, tournarockers, Acey wagons or for similar equipment (12 cu yds or less); Mobile mixer truck; Tandem Axle trucks pulling tilt-top trailer; Tandem - Axle lowboy; Tri- Axle batch Truck; Tri-Axle grease and maintenance truck

GROUP 8: Tandem-tandem semi trucks; Truck mechanics and welders; Heavy equipment-type water wagon over 5,000 gallons; Tri-Axle Trucks pulling tilt-top trailer; Low-boys, tandem-tandem axle

GROUP 9: Low-boys, tandem tri-axle; Acey wagons up to and including 3 buckets; Equipment when not self-loaded or pusher loaded, such as koehring or similar dumpsters, Track Trucks, Euclid bottom dump and hug bottom dump, Tournatrailers, Tournarockers, Acey wagons or for similar equipment (over 12 cu yds.)

GROUP 10: Pick-up trucks

GROUP 11: Helpers; Greasers; Tire men; Batch board tenders; Warehouseman

GROUP 12: Acey wagon (over 3 buckets); Quad Axle Trucks; Articulating Dump

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic

violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

Anaerobic Digester Floating Covers Inspection Report

AnDig System Inspection Report

Carmel, IN

Date of Inspection: July 10, 2019

Purpose of Trip: Inspect existing Anaerobic Digestion Floating Covers

Representative: HP Thompson – Lance Gaffin

Inspector: Evoqua Water Technologies – Tom Mangione

Engineer: American Structure Point

Plant Personnel:

General Comments: For an anaerobic digester system to properly operate, there are a few conditions that are necessary.

- Anaerobic describes the absence of oxygen. So the tank needs to be covered to prevent absorption of oxygen from the atmosphere. Additionally, the cover should have the ability to collect and direct the biogas produced by the process.
- It must be well mixed. The retention time for a mesophilic digester is 15 to 20 days, the sludge fed each day must be mixed with the sludge already in the digester.
- It must be maintained at a constant temperature, 95°F for a mesophilic digester. The largest portion of that temp comes from bringing the raw sludge from 55°F (in winter) up to 95°F.
- It should be fed on a regular basis.
- It should have the ability to safely utilize the free bio-methane being produced. It must be able to safely handle the bio-methane if it is not utilized. The waste gas burner should be sized to flare off all the gas being produced at any one time.

Background: The city has four anaerobic digesters, two with floating covers and two gasholders. They want to evaluate the covers current condition.

The truss of a duo deck cover is its strength, so inspection of the trusses is critical.

Observations: The covers are identified as Digester #1 and #2.

#2 was inspected first and is situated on the southwest side of the digester head house. The cover was centered in the tank, had 6 to 8" of free board (as designed) and has 6 top rollers, all of which are frozen. This cover once had a PEARTR gas mixing system which was removed and now has two external draft tube mixers. The gas dome showed some minor corrosion as did the other roof plates.

The attic space is in very good condition. All of the trusses are straight, in line, no bent or twisted members. There were a few places where some water had sat at one time, could have been a month or a year ago, but it was dry at the time of the inspection, and therefore a little discolored.

There were about half a dozen places where patches of paint, the largest was about 6" x 6", had peeled away, but the primer underneath looked pristine.

The gas dome was also in very good condition along with all the associated structural members.

Digester #1 was inspected next. It is also centered in the tank, but it had no freeboard, meaning the sludge was right up to the top of the rim skirt. That could be attributed to the fact that the cover was slightly out of plumb. There was some minor foaming and only two of the six rollers turned freely.

The attic space of digester #1 was similar to digester #2 with the exception that two of the bays, that are opposite of each other (one containing the entrance hatch was the first one) had coatings that were much older than the other ten bays. These same two bays contained no ballast blocks either. Apparently, the last time this cover was rehabbed, these two bays were ignored during internal coating time.

The truss members were all straight and unbent and untwisted.

I have no notes about the PVR's on these two covers so I can only assume they are in good condition.

Recommendations: These covers are in good condition. The rollers should be replaced. They will need recoating in a few years but are otherwise good to go.

I would look to see the last time these were taken out of service. The only thing I could not inspect is the bottom of the ceiling plates, but I did bang on them in several places (as well as the gas dome) and there was nothing noted to cause a concern.
